

People v Ferency 7 Guidelines

- State Certified Radar Operator
- Speed Measurement device in proper working condition/properly installed
- Road Conditions minimized distortion (straight, curve, fog, rain)
- Input speed of the patrol vehicle was verified
- Calibrated prior and after the shift
- Vehicle was in the operational beam
- Unit has been certified for use by an agency with some demonstrable expertise in the area

Questions

- 1) Anything obstructing your radar beam/view of the defendant's vehicle?
- 2) Any other vehicles on the roadway?
- 3) Was a speed limit sign clearly posted and was there anything obstructing that sign from view?
